

Parallel Session 15**Thursday, July 5, 16:00PM-18:30PM**

Special Session 4	Nonlinear PDEs and Control Theory with Applications Organizer(s): Barbara Kaltenbacher, Irena Lasiecka, Petronela Radu, Lorena Bociu	Location GRC-B
16:00-16:30	Pelin Guven Geredeli (Hacettepe University, Turkey) Global attractors for von Karman plate model with a localized damping	Abstracts p. 19
16:30-17:00	Jing Zhang (University of Virginia, USA) min-max game problem for coupled PDE system and an application to the fluid-structure interaction model	Abstracts p. 22
17:00-17:30	Shitao Liu (University of Helsinki, Finland) Recovering sound spend and initial data for the wave equation by a single measurement	Abstracts p. 20
