Parallel Session 2   Sunday, July 1, 13:30PM-15:30PM

Contributed Session **02**	**ODEs and Applications** Chair(s): Zhaosheng Feng	Location **REH-3**
13:30-13:50	Abdallah A Badr (Alexandria University, Egypt) Monte - Carlo Galerkin Approximation of Fractional Stochastic Integro-Differential Equation	Abstracts p. 313
13:50-14:10	Dulat D Dzhumabaev (Institute of Mathematics MES of Kazazkstan, Kazakhstan) The parametrization method of research and solving of boundary value problems for integro-differential equations	Abstracts p. 314
14:10-14:30	Dmitriy Chebanov (City University of New York, USA) New class of exact solutions for the equations of motion of a chain of n rigid bodies	Abstracts p. 313
14:30-14:50	Dan Comanescu (West University of Timisoara, Romania) Geometrical dissipation for dynamical systems	Abstracts p. 314
14:50-15:10	**CANCELLED** ~~Susmita Sadhu (Southwest Minnesota State University, USA)~~ ~~Uniform asymptotic expanisons of solutions of a class of singularly perturbed boundary value problems~~	Abstracts p. 315
14:50-15:10	**New talk** Vlajko Kocic Global asymptotic behavior of some nonlinear nonautonomous difference equations	Abstracts p. 311
